

In the Specification:

On Page 13, substitute corrected new paragraph [0046] for the existing paragraph [0046], as follows:

[0046] As stated above, the accessory may incorporate transmural systems to determine when a given ablation is ~~complete~~ complete, e.g. an ablation lesion is formed throughout the depth of the target tissue. Such transmural systems include those described in ~~co-pending~~ patent application serial no.: 10/370, 179, now abandoned, entitled "Apparatus and Method for Assessing Tissue ablation Transmurality", and ~~co-pending~~ patent application serial no.: 10/369,887, entitled, "Apparatus and Method for Assessing Transmurality of a Tissue Ablation", now issued as U.S. Patent No. 7,192, 427, both of which are incorporated herein by reference in their entirety.
